

ILLINOIS STATE UNIVERSITY

ARBORETUM MAP

The Fell Arboretum is a valued asset to Illinois State University. It provides both a beautiful location to visit and is also a functional outdoor tree and plant library for academics and enthusiasts. The goal is to provide the University and public with an environment conducive to learning, teaching and demonstrating the importance of trees, woody plants and landscapes of

intrinsic beauty. We aim to accomplish this by utilizing best practices as they apply to horticulture, botany, biology and agriculture. In doing so, Illinois State University will be recognized as a leader in creating and maintaining a respected and diverse arboretum.
